myMetals

Software which is simple to use

www.mymetals.cloud

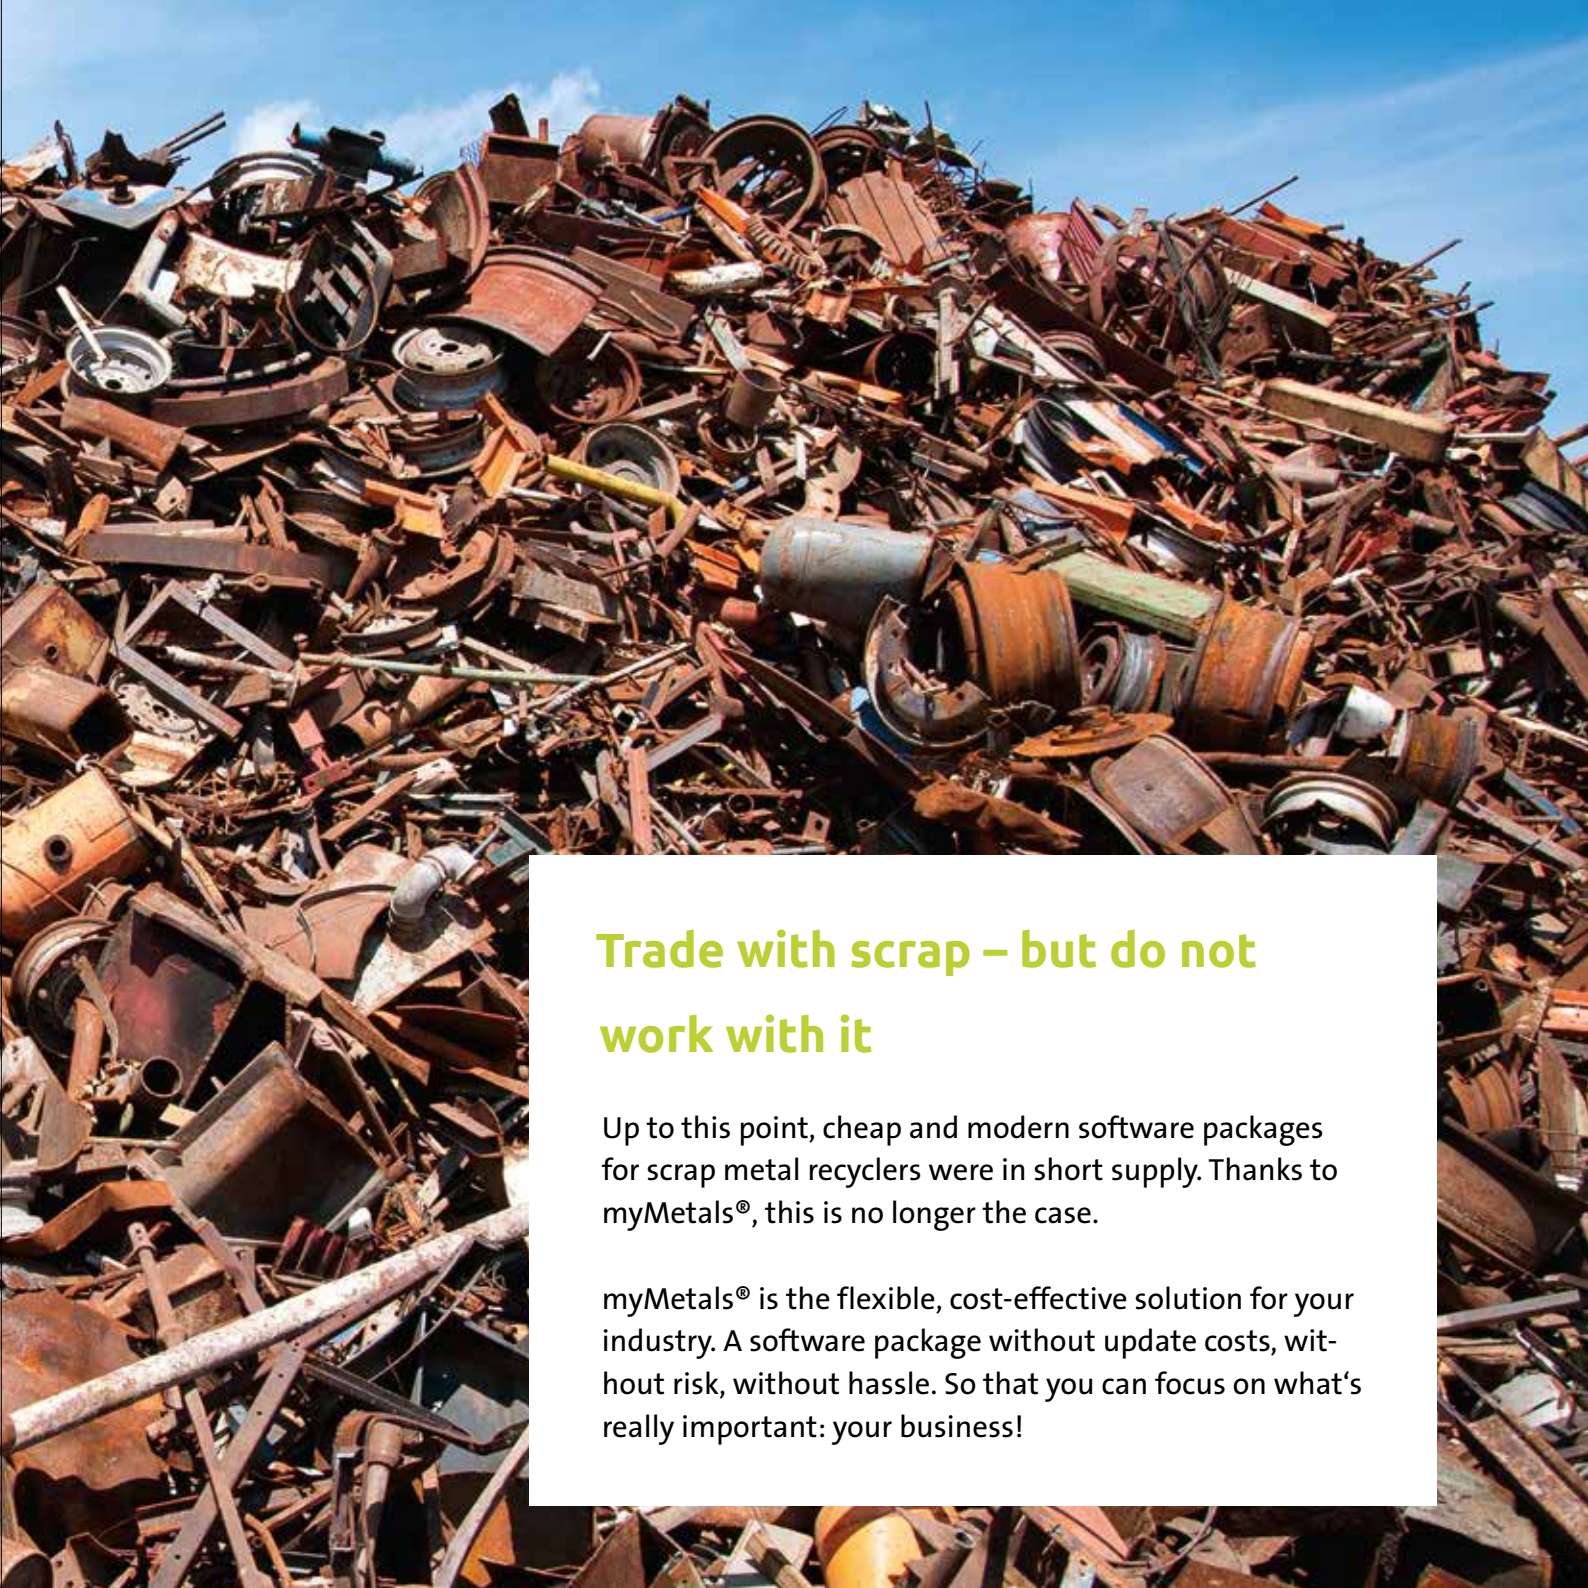

myMetals® | As simple – is simply good

With myMetals®, you have all your business processes under control – from anywhere! Save the cost of complex and expensive software packages from different vendors.

Reduce your paperwork, and oversee and control all transactions

Your company in only one application with just a few clicks. Thus no additional software is necessary, for example, for your scales. Increase your liquidity by sending an invoice immediately after the goods receipt or goods issue.

Of course, this can also be done purely electronically via e-mail. Your additional benefits: no contractual obligation, can be cancelled on a monthly basis, free updates and everything at an attractive basic price.

Trade with scrap – but do not work with it

Up to this point, cheap and modern software packages for scrap metal recyclers were in short supply. Thanks to myMetals®, this is no longer the case.

myMetals® is the flexible, cost-effective solution for your industry. A software package without update costs, without risk, without hassle. So that you can focus on what's really important: your business!

Benefits

- Quick start and short familiarization period. With myMetals®, you can **start today** – your ERP solution “on demand”.
- You can use myMetals® in a totally **flexible** manner – whether via a **smartphone, tablet** or **PC**.
- Instant access to all important data – no matter where or when!
- Your data in safe hands – optimal data protection is guaranteed thanks to a strong partner in the form of Microsoft.
- Benefit from the **powerful** basic functions of the premium product **comotor**.
- **No contractual obligation** – no risk! You can easily cancel myMetals® at the end of each month.
- Additional services can be booked at any time!
- Customer service to its full extent via **live chat, e-mail, phone**.

myMetals® | The ERP solution “on demand”

The use of various apps on a smartphone is now the rule. It is logical because they are easy to use, cheap and can be used from anywhere. It was only business software that did not work so well previously. Why not?

With myMetals®, you can finally control your company with a smartphone and a tablet. Easily check your daily income and expenditure on your mobile. Enter material inputs and outputs directly on the spot with ease on your iPad.

Document deliveries with your smartphone or tablet by taking a photo and filing it with the transaction.

myMetals® 360° Service Package!

The Full Service

with your hardware options

You can use myMetals® very flexibly – whether with a smart-phone, tablet or PC.

Microsoft Partner
Gold Enterprise Resource Planning
Silver Customer Relationship Management

myMetals® | The full service package for your industry

With myMetals®, you work in a flexible environment with the device of your choice. No need for countless programs to complete your day-to-day work. Everything is from a single source.

How does this work?

myMetals® has all requisite functions for the metal and recycling industry and is an almost perfect work tool through its integration with Office 365.

myMetals® | Support in your day-to-day business

Weighing Wizard

myMetals® eliminates the need for any additional weighing software, regardless of whether a large weighbridge or small quantity weighing system is involved.

Warehouse management

With myMetals®, you always have an up-to-date and accurate overview of your stock values and quantities. This is the most important factor in the scrap metal trade in addition to easy-to-use scales.

Container management

With myMetals®, you can keep track of the locations of your containers.

Flexible pricing

myMetals® is as flexible as your day-to-day business – whether it is a matter of price lists per customer, prices for customer groups, reference prices or even retroactive pricing. With myMetals®, calculatory challenges become child's play.

Disposal

With myMetals®, you have a quick overview of your waste disposal flows. With just a few clicks, you can trade in materials requiring disposal. myMetals® structures the whole process easily and clearly – regardless of whether you are selling a disposal service, recycling by yourself or purchasing from a disposal company.

Vehicle dispatching

Efficient scheduling of your vehicles and easy tour planning via „drag & drop“.

Cash accounting

myMetals® guarantees smooth personal delivery. The process can be mapped completely in the software. There are no additional invoices and documents.

Processing of purchases and sales

Of course, it is standard practice for us that myMetals® assists you with commercial clients as well as in the private client sector.

Complete financial accounting

With myMetals®, you have all business processes under control.
